

TIPTON AIRPORT

RUNWAY EXTENSION & AIRPORT DEVELOPMENT

DRAFT ENVIRONMENTAL ASSESSMENT /
SECTION 4(f) EVALUATION

Project Update - April 2018

Environmental Studies Continue

The Tipton Airport is currently preparing an Environmental Assessment (EA) in accordance with Federal Aviation Administration (FAA) and National Policy Act requirements to evaluate the extension/widening of Runway 10/28 and various development projects.

The EA was previously available for public review and comment in late 2014. Since that time, the Airport has further refined the proposed project and currently re-coordinating with various environmental and regulatory agencies. The purpose of this newsletter is to provide an update on the current project schedule.

Project Schedule
